Index to Volume 22

Achilles tendon
  overuse injuries, surgical treatment, 611
  rupture, immediate postoperative motion, 607
ACL
  allografts
    chemically processed, 378
    freeze drying and ethylene oxide sterilization, 562
    mechanical properties, 328
  deficient knee
    axial rotation, 289
    EMG analysis, 651
    long-term outcome, 632
    motion, role of medial structures, 402
    motion analysis, 105
    neuromuscular performance, 89
  injuries
    bilateral, 37
    intercondylar notch stenosis, 198
    open physes, 478
  insufficiency, standing balance, 531
  loading during isometric muscle contractions, 418
  reconstruction
    allograft, chemically processed, 378
    autograft fixation, 344
    bone tunnel enlargement, 410
    children, 44, 48
    comparison of through-the-condyle and over-the-top techniques, 659
    EMG analysis, 651
    free autogenous tendon graft, 758
    graft
      decontamination, 387
      femoral attachment site, 518
      fixation, 240
      impingement, 415
      patellar tendon versus semitendinosus and gracilis, 211
      placement, 659
    infrapatellar contracture syndrome, 440
    interference screw fixation, 334
    intraarticular-extraarticular combined, 620
    LAD, semitendinosus-gracilis graft, 524
    laxity, patellar tendon autograft, 812
    open physes, 478
    patellar tendon
      autograft, 774
      graft site morbidity, 324
    stability, femoral insertion site, 518
  tear, arthrometry to distinguish partial tears, 294
  tibiofemoral rotation after injury, 289
  tunnel placement, patellar tendon graft wear, 131
Acromial process, stress fracture, 146
Acromiohumeral interval, rotator cuff compression, 779
Acromion, rotator cuff repair through acromion-splitting approach, 306
Adolescent
  ACL injury, open physes, 487
  CT for patellar malalignment, 55
  football players, physical characteristics, 859
Aglietti P, 211
Aircast Sports Stirrup, 454
Albright JP, 2, 12, 158, 392
Allograft
  ACL, effect of processing techniques, 378
  bone tunnel enlargement, ACL reconstruction, 410
  donor age and strain rate, biomechanical properties, 328
  freeze drying and ethylene oxide sterilization, 562
  patellar tendon, biomechanical properties, 328
Altchek DW, 177
An K-N, 499
Anderson AF, 620
Anderson J, 454
Andrews JR, 26, 33, 230, 667
Andrews M, 48
Anesthesia, ankle ligament, proprioception, 223
Animal studies
  dog, patellar tendon, removal of medial third, 136
  rabbit
    autograft
      augmentation, patellar tendon, 821
      fixation, 344
    cartilage growth, 485
    corticosteroid injections and ligament healing, 279
    graft decontamination, 387
    muscle
      function, tourniquet ischemia, 372
      injury threshold, 257
      strain, 558
    patellar tendon, scar formation after graft harvest, 803
  rat, muscle contusion injury, 702
  sheep, ACL allografts, chemically processed, 378
Ankle
  braces versus taping, 78
  injuries
    evaluation, 462
    inversion, volleyball, 595
    prevention with semirigid stabilizer, 454
    ultrasonography for ligament injuries, 855
  joint, free motion after Achilles tendon repair, 607
  lateral ligaments
    anatomy, 72
    proprioception, 223
    reconstruction, comparison of procedures, 313
    sprain, early mobilization versus immobilization, 83
  orthosis, effect on proprioception, 223
  proprioception, 223
  sprain
    early mobilization versus immobilization, 83
    prevention, 78
    Sport-Stirrup, soccer players, 601
  stability, taping versus braces, 78
  stabilizer, semirigid, 454
